

TEAM BUILDING

Clay Sculpture

A team building that not only creates bonds and cooperation among staff, but also encourages creative thinking.

Engage in team building in the comfort of your office where everyone is staff is able to participate. Team buildings activities often revolved around doing physical activities that may not be suitable for all staff.

Let your staff engage in a creative workshop using angel clay (a special type of clay make using nano-technology) to instill cooperation and develop teamwork among the staff.

Contact us at corporate@vrngroup.org for more details.

**(CSR Programmes for the children are also available
for this workshop)**
